## Installation Notes

Although Celebrity Poker runs optimally in 640x480, 256 colors, it will run in all other modes. Performance will suffer slightly when running in other modes.

Because Celebrity Poker takes advantage of video accelerator extensions such as **WinG**, it is recommended that you have one loaded on your system. We have included WinG on the Celebrity Poker CD in case you do not have an extension of this type. Just select the **Install WinG** option during installation.

Celebrity Poker requires some hard drive space to install. The installation program will automatically check to see if you have enough space, and will notify you of its requirements.
